Boğaziçi University

EC 205 Macroeconomics I
Spring 2018
Syllabus

Instructor: Orhan Torul
E-mail: orhan.torul@boun.edu.tr
Website: www.econ.boun.edu.tr/torul
Office: Natuk Birkan Building NB 222A
Telephone: 212-359-6677

Teaching Assistants
TBA

Lectures: EC205.02: T78 NB119 (Tuesday 15:00-16:50 Natuk Birkan 119) &
Th8 NH101 (Thursday 16:00-16:50 New Hall 101)

Office Hours: M78 (Monday 15:00-16:50) or by appointment (Natuk Birkan 222A)

Course website: Boğaziçi University Moodle Pages

Textbook: Macroeconomics, 8th Edition by Gregory N. Mankiw ISBN-10: 1429240024
(6th and 7th editions are also fine, yet students holding the earlier versions of the book are responsible to keep track of changes in the editions. Note that although a newer version (9th Edition) of the book is released, I will use the 8th edition.)

Prerequisites: EC 102 Principles of Macroeconomics

Course Objectives: The main objective of the course is to enable students to have a sound understanding of macroeconomics by studying the foundations of the modern macroeconomic theory. For this goal, we will analyze several well-established macroeconomic models with different features and assumptions to explore different aspects of macroeconomics. Our initial focus will be on the long-run aspects of macroeconomics. We will first study the “classical theory” so as to understand what determines long-run values of main macroeconomic variables, such income/output, unemployment, inflation, interest rate, among others. Next, we will concentrate on short-run dynamics and business cycles. We will make use of the Keynesian IS/LM models so as to investigate the causes of short-run fluctuations and study how policy-makers can fine-tune the economy (via fiscal and monetary policies) in the event of adverse or favorable shocks. Finally, we will discuss concerns and shortcomings of Keynesian models, and explore the foundations of “Real Business Cycle” theory, which uses consumer optimization by the use of constrained optimization at its heart.

Grading: The final grade will be based on problem sets, midterm exams, and a cumulative final exam. The weights are as follows:

- 2 Problem Sets: 10% (each of which has a weight of 5%)
- 2 Midterm Exams: 60% (each of which has a weight of 30%)
- Final Exam: 30%

The standard catalog grading protocol accepted at Boğaziçi University is as follows:

Grade	Interpretation	Weight	Grade
AA	Excellent	4.0	90%
BA	Good-Excellent	3.5	85-89%
BB	Good	3.0	80-84%
CB	Passing-Good	2.5	75-79%
CC	Passing	2.0	70-74%
DC	Passing-Poor	1.5	65-69%
DD	Poor	1.0	60-64%
F	Failed	0.0	0-59%

Yet, your letter grades can be adjusted based on the average and standard deviation of the cumulative grades of EC205 classes (past & present ones).

Last day for withdrawal from the course is April, 12th, 2018, Thursday.

Tentative Midterm Exam Dates:

- Midterm Exam I: March 16th, 2018, Friday
- Midterm Exam II: April 27th, 2018, Friday

The above midterm exam dates are only tentative, and are subject to change depending on our progress throughout the semester.

The first midterm will cover topics up to the first midterm, and the second midterm exam will be based on topics covered between the first midterm exam and the second. Midterm exams will be given after 17:00. It is imperative to be on time since extra time will not be given for late arrivals. Midterm exams will have both multiple choice, and problem- solving & essay parts.

Final Exam Requirements: In order to be able take the final exam, students are required to earn at least 40% of the available points on the midterms and problem sets. Students below this threshold will be announced on the course website prior to the final exam date, and they will not be allowed to take the final exam.

Final Exam:

- Final Exam: May 2018, TBA

The final exam will be comprehensive, with a greater weight on the post-midterm 2 topics. Timeliness is expected since extra time will not be given for late arrivals. Final exam will also be comprised of both multiple choice, and problem-solving & essay parts.

Attendance: Regular attendance is expected and very strongly recommended.

Problem Sets: There are going to be two problem sets, both of which will be graded, each contributing to 5% of your overall grade. Problem sets are will be posted online (to the course website), and their due dates will be announced on the course web site along with problem sets. Please check the course web site frequently so as not to miss deadlines.

Problem Sessions (Recitations): There will be weekly/biweekly problem sessions held by your teaching assistants (date and time will be announced). Attendance is very strongly recommended but not mandatory.

Communication: Most of the course materials (except for those by the text book publisher) will be posted on the course website. E-mail will be used as the primary means of communication outside the classroom, and I will be sending e-mails whenever necessary to inform you on updates of the course. Please make sure that the e-mail address you have with the Registrar's Office is up-to-date so that you will not miss any of the announcements. I will also post announcements to the course web pages, so I would recommend you to keep track of the modifications to the Moodle pages, as well.

Make-up Exam Policy: All students are required to attend both the midterm and final exams. Make-up exams will be granted only to those students whose excuse complies with the University policy. If you believe you are eligible to take a make-up exam, please inform me and provide the appropriate documentation as soon as possible, no later than one week (7 calendar days) after the exam, preferably before. Make-up exam requests should be directed to me in person with proper documentation (along with a clear written explanation of the reason of absence accompanied with the valid excuse documents).

Exam Re-grade Policy: If, after going over your exam and the exam solutions, you believe some of your solutions were more correct than originally judged to be, you may submit, in writing, an exam re-grade request. Your re-grade request must specify which solutions(s) you believe were not graded appropriately and a substantive explanation for why you believe your solutions is more correct than originally judged (thus, re-grade requests than consist of essentially nothing more than "I think I should have received more points on this question" will not be considered). Your entire exam is subject to re-grade, thereby raising the possibility of a lower grade. Exam re-grade requests are due no later than one week (7 calendar days) after exams are announced – this deadline applies even if you are not present in class the day graded exams are returned (it is your responsibility to pick up your graded exams in a timely manner).

Accommodations: Students who require special accommodations for exams must get in contact with me within the first two weeks of classes.

Academic Integrity: The undergraduate program of the Department of Economics is conducted within the framework of the Student Discipline Regulations of the Turkish Council of Higher Education (TCHE, Yükseköğretim Kurulu, YÖK in Turkish), and rules accepted by the Boğaziçi University Committee on Ethical Conduct.

For the student discipline regulations by the TCHE (YÖK), see (in Turkish):

<http://bit.ly/yokdisiplinyonetmeligi>

For the ethics code accepted by Boğaziçi University, see: <http://bit.ly/bounethics>

The students of the Department of Economics are also informed about the consequences of academic dishonesty at the EC 103 Orientation to Economics course. For a brief refresher, see <http://bit.ly/ec103notes>

If you engage in dishonest practices (e.g. cheating, plagiarism,) you will be subject to **severe punitive disciplinary measures!** If you are not sure whether a practice qualifies as dishonest, please be do ask in advance and be precautionous.

Copyrights: Course materials are copyrighted. Selling or distributing copies or modified copies of instructors' course materials or assisting another person or entity in selling or distributing those materials without permission is strictly prohibited.

Outline of topics: The following is a sketch of topics we will cover this semester – it may be modified as the course progresses, and is only tentative.

Tentative Week	Required Reading
Week 1: February 6-8	Chapter 1: The Science of Macroeconomics Chapter 2: The Data of Macroeconomics
Week 2: February 13-15	Chapter 3: National Income: Where It Comes From and Where It Goes
Week 3: February 20-22	Chapter 3: National Income: Where It Comes From and Where It Goes (cont'd) Chapter 4: The Monetary System: What It Is and How It Works
Week 4: February 27-28	Chapter 4: The Monetary System: What It Is and How It Works (cont'd) Chapter 5: Inflation: Its Causes, Effects and Social Costs
Week 5: March 6-8	Chapter 5: Inflation: Its Causes, Effects and Social Costs (cont'd) Chapter 7: Unemployment
Week 6: March 13-15	Chapter 7: Unemployment (cont'd) Chapter 8: Economic Growth I: Capital Accumulation and Population Growth Lecture Notes on Economic Growth (cont'd) Midterm Exam I on March 16th (TENTATIVE DATE)
Week 7: March 20-22	Chapter 8: Economic Growth I: Capital Accumulation and Population Growth (cont'd) Chapter 9: Economic Growth II: Technology, Empirics and Policy Lecture Notes on Economic Growth (cont'd)
Week 8: March 27-29	Chapter 10: Introduction to Economic Fluctuations
Week 9: April 3-5	Chapter 11: Aggregate Demand I: Building the IS-LM Model
Week 10: April 10-12	Chapter 12: Aggregate Demand II: Applying the IS-LM Model
Week 11: April 17-19	No Class (Spring Break)
Week 12: April 24-26	Chapter 14: Aggregate Supply and the Short-Run Tradeoff Between Inflation and Unemployment

	Midterm Exam II on April 27th (TENTATIVE DATE)
Week 13: May 1-3	No Class on May 1 (Labor Day) Optimal Consumption: Mathematical Refresher (Handout Chapter - 1) Optimal Consumption: Representative-Agent Macroeconomics (Handout Chapter 0) Optimal Consumption: Microeconomics of Consumer Theory (Handout Chapter 1) Optimal Consumption: Static Consumption Leisure Model (Handout Chapter 2)
Week 14: May 8-10	Optimal Consumption: Dynamic Consumption Saving Model (Handout Chapter 3) Optimal Consumption Chapter 4: Inflation and Interest Rates in the Consumption-Savings Model (Handout Chapter 4) Optimal Consumption Chapter 25: History of Macroeconomics Final Review (time permitting) Classes end on May 11, 2018
	Final Exam May 2018, TBA
